

## **- Petition -**

*Petition to the House of Commons in Parliament assembled, WHEREAS*

Canadians want an end to the outdated paper and mail in voting ballots in Canada and instead want a technologically updated secure biometric online voting democratic system.

- Both the federal government and provincial government no longer function within the framework of the Canadian Constitution and the Canadian Bill of Rights;
- The fundamental principles of democracy in Canada is based on political equality – instead we see private foreign corporate entities such as the World Economic Forum given priority;
- In Canada we see a type of government forming where one person or a group of stakeholders enjoy unbridled power in the absence of any limitations nor adherence to the law;
- MP representatives no longer reflect the interests of their constituents and there is an urgent need to restore this power in our democracy;
- It is also the sacred Oath of Allegiance and duty of the members of the Government of Canada to guard against rights infringements and guarantee the freedoms and equality of all Canadians and they have failed to do so;
- Promoting individual sovereignty in Canada is of utmost importance and is a fundamental right in a free and open society – instead we see in Canada – a government actively attempting to remove our fundamental rights and freedoms;
- The technology easily exists for secure citizen voting on bills and monetary decisions using facial recognition, on-screen finger prints, etc right from a cellular phone;
- The people of Canada need to collectively make decisions for themselves, rather than having their political affairs decided by MP's who fail to represent their constituents;
- Constituents have little communications with their MPs as texts are not answered, emails are never answered, letters are rarely answered, phone communication is blocked by front desk clerks and meetings take months to book;
- MP's have no legitimate means to connect with their constituents on political issues of importance, other than guess work;
- MPs in the House of Commons already use facial recognition to vote from their cellular phones.  
<https://www.ourcommons.ca/Content/Newsroom/Articles/Factsheet-ElectronicVotingSystem-e-Final-02-25.pdf>
- Paper mail-in ballots have been proven to be unreliable and impossible to verify by constituents;
- Instead of using this technology for the WEF Klaus Schwab QR code Chinese style social credit score, Canadians choose to use the technology to have a voice in a participatory democratic system;
- There is an expanding list of countries, like India, who have a form of Direct Democracy, and it is time for Canada to expand our commitment to democracy and implement a high tech direct democracy system;

*We, the undersigned citizens and residents of Canada call upon the House of Commons and the Senate to:*

- 1. Desist extending the paper / mail in style of elections in Canada and instead enlist the technology available in the 21<sup>st</sup> century for biometric voting;*
- 2. Immediately form a committee to implement a secure platform for the Biometric Voting project;*
- 3. Call upon **Elections Canada** to design a high-tech biometric online voting system;*

*Canadians feel we are voting with an ancient flawed system and demand an update with secure biometrics.*

*Dated this \_\_\_\_\_ day of \_\_\_\_\_, 20 \_\_\_\_.*
